Denture Teeth

Acrylic

Portrait IPN

Anterior and Posterior Teeth can be used for male or female if characterized. Over 50 anterior and 19 posterior molds exist. The most widely used molds by Dr. Massad are: 12-E, 13-E, 32-B, and 21-D.

Portrait IPN 40 degree

A fully anatomical posterior tooth suited for complete, partial, and combination cases. Use lingual bur to obtain lingualized occlusion. Great results for those who advocate balanced Lingualized occlusion.

Product Suggestion

Dentsply Trubyte
(800) 786-0085 x4452
www.dentsply.com

Dr. Massad also uses the **Fox Occlusal Plane Plate** offered by Trubyte.

Geneva 2000

by
Geneva Dental, Inc.
(800) 436-3827
www.geneva-dental.com

Beautiful natural looking porcelain anterior teeth from Switzerland. Most widely used anterior molds used by Dr. Massad: (Shade J0, 900, 901) Male- 303, 342, 343, 353 Female- 201, 202, 332, 333

Partial Dentures

Techniques

The Lab Technicians recommended in this list are well prepared to deliver quality results from the techniques that Dr. Massad teaches.

Modified Massad Metal Base Technique

This technique uses tissue stops on the retromolar pads and anterior mandible. This is the most popular and represents Dr. Massad's most recent improvements. Remember to ask for acrylic baseplate.

Standard Massad Technique

This technique has the retromolar pad in metal and anterior stop on tissue side. Ask for acrylic baseplate.

Shipmon Technique

This technique has all metal on tissue.
